Flexible IT System with Microsoft Dynamics NAV for Growing Manufacturing Business Needs

Customer Overview

Flexible IT System with Microsoft Dynamics NAV for Growing Manufacturing Business Needs

A renowned client of manufacturing industry who offers a wide range of products under different brand names. Their offerings include metal roof flashings, roof windows, steel lintels, electric operations kits and accessories, masonry support, blinds, etc. As a leading company in their domain, client had ambitious plans for expanding their range of products, and they needed an effective IT system for business management that could help them in this expansion.

Project Features

The key features of the project are as follows:

- Real-time management information is made available in an easier and better way.

- Data interrogation and analysis processes were streamlined.

- Users across the organization, belonging to different units, will be able to calculate important and relevant Key Performance Indicators using the application.

- Detailed information pertaining to business performance is accessible.

- The system has a user-friendly interface to encourage smooth transition for employees.

OUR CORE VALUES: PASTA - P = Passion, A = Appreciation, S = Simplicity, T = Trust, A = Accountability

Problem Statement

The client's business was undergoing major expansions in their range of products and services offered. Their old IT system was proving to be tedious in light of these expansions. Information flow and availability in the old system was largely dependent on manual processes, which made processes like data querying and analysis very time-consuming. Client required a system using which real-time management related information is available quickly and accurately, so that all the dependent business processes on this information are also streamlined.

CIS Solution

On assessing the needs of the client, we concluded that these will be best met with Microsoft Dynamics NAV, since the software offered the robustness and reliability that client wanted for their business. Collaborating with the client, CIS tailored a customized solution which improved visibility into the management and performance related business information, ensured highly efficient information availability, interrogation and analysis, and facilitated smarter decision-making.

Positive Outcome

The client appreciated the extensive expertise and experience that CIS team had in Microsoft Dynamics NAV customization and implementations. The final product was greatly received by the client. The product helped them in achieving more time- and cost-effective decision-making. Client now has the means to expand their business while keeping close tabs on their performance milestones.

Technologies Used

Microsoft Dynamics NAV

Microsoft SQL Server

Office

C#
